

Please accpet my late comments on 96-98.

I am writing in support of CUB's request for a permanent waiver for 10 digit dialing in the 847 area code. This is an example of wasteful behavior on the part of the phone companies. All of the numbers have not been used up and this places an enormous burden on consumers. I think that 10 digit dialing is simply awful. Please provide the permanent waiver which has been requested.
